

Plug & Play
Aquarium™

34 Gallon

Red Sea MAX

The Complete Reef System

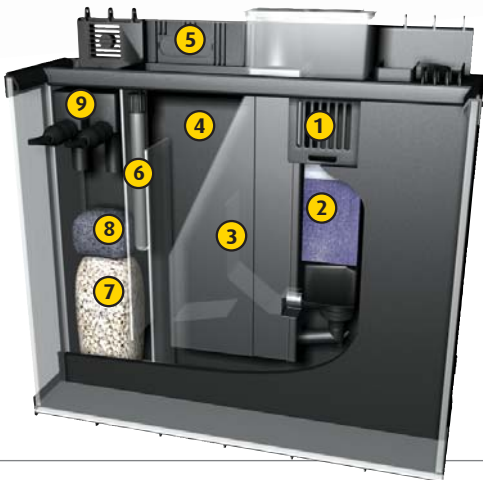

A fully featured, plug-and-play reef aquarium that makes reef keeping easier than ever before

The Red Sea MAX combines all of the technology necessary to grow and maintain a healthy reef in an elegant aquarium, allowing aquarists to focus on the joy and beauty of the hobby rather than on component selection and installation. Optimal lighting, filtration, temperature and circulation makes reefkeeping easier than ever before and ensures maximum success for aquarists at all levels.

Pat Pending

Reef Filtration & Circulation

Complete hidden water treatment center

- 1 - Removable inlet filter comb with adjustable shutter for surface skimming
- 2 - Two stage (course/fine) mechanical filter sponges
- 3 - Professional turbo protein skimmer driven by a 320 gallons-per-hour pump
- 4 - Compartment for chiller pump
- 5 - Access panel for chiller inlet/outlet tubes
- 6 - Thermostat-controlled heater
- 7 - Highly porous ceramic biological filter media
- 8 - Activated carbon chemical filter media
- 9 - Twin circulation pumps with adjustable direction outlets (2 x 145 gph)

Red Sea MAX comes in 3 different colors: black, silver and white.

 Red Sea

Reef Lighting

Removable hood

Complete lighting system

- 2 x 55 watt T5 power compacts (1 watt/liter)
- 10,000K/Actinic lighting
- Electronic ballast
- High polish, textured aluminum reflector
- Blue LED moonlights
- Fan-cooled hood for extended life of electronic components
- High transparency, polished lens

MAX Accessibility

- 1 Skimmer access**
Easy viewing and maintenance of protein skimmer.

- 2 Front access**
Full width front opening for feeding, monitoring and other light maintenance. Folds back to provide a stable work surface with dedicated locations for test tubes and hydrometer.

- 3 Main access**
For aquascaping and maintenance, the entire hood can be raised and secured at an angle that gives easy access to the complete aquarium and provides full lighting without glare.

MAX Control

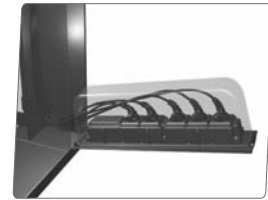

Hood control panel

- 24h programmable lighting timer with integral on/off/auto switch
- on/off switch for moonlights

Main control panel

Conveniently positioned water-proof power switches for all aquarium components.

Power center

- 5 individually switched power outlets with splash cover for all aquarium components
- Single power cord

#69123

Total system volume	34 gallons
Aquarium volume	29 gallons
Filter volume	5 gallons
Aquarium Length	24"
Aquarium Width	19.7"
Aquarium height	19.7"
Total height	24.1"
Glass thickness	5/16"
5 outlet power center	✓
Course mechanical media	✓
Fine mechanical media	✓
Skimmer volume	1 gallon

Skimmer pump	300 gph
Collection cup volume	0.4 gallon
Circulation pumps	2 x 145 gph
Ceramic bio-media	0.5 gallon
Activated carbon	7 oz
Fan cooled hood	✓
Lighting - 10,000K	55W
Lighting - Actinic	55W
Electronic ballast	✓
LED moonlights	✓
24 hour programmable timer	✓
Thermostat heater	150W

Red Sea MAX Starter Kit

(sold separately) 22 lbs Reef Base, 55 gal Coral Pro Salt, Hydrometer, Nitro Bac bio starter, Marine Lab master test lab, Calcium Pro test lab, Buff pH & alkalinity stabilizer, Calcium+3 - calcium & trace element supplement, MarineGro food (sample)

Manufacturer reserves the right to change the specification without notice. Designed to safety standards: EN 60335-2-55, 60598-2-11 & UL 1018
